

REDUCE YOUR COSTS & INCREASE YOUR COMFORT

A message about air sealing and ductwork

Up to **20%** of the air moving through the duct system in your home could be lost due to leaks and poorly sealed connections.

Proper air sealing is simple and has many advantages:

It can help you **save** money on your energy bills

It can dramatically increase your **comfort** through every season

It's the most cost-effective way to improve your home's energy **efficiency**

It helps prevent pollen, dust and insects from entering your home

Common locations of air leaks are attics, crawl spaces, doors, windows and vents. For more information about saving energy, visit:
